For a more lively visitor experience, the pattern here could be slightly animated, perhaps with a very soft parallax effect as you scroll down.

It could behave similarly wherever the pattern appears.

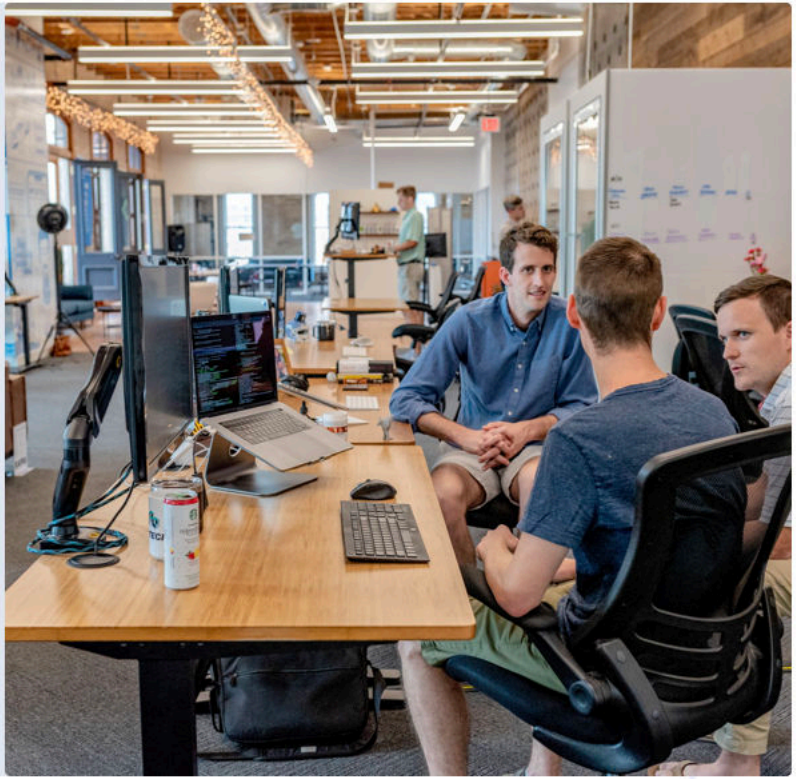
Ideally the use of image is recommended, it's possible that the component also doesn't feature an image, in this case the citation block occupies all 7 columns on the right

Add a new comment



The pressure on margins and the high relative part of what purchasing represents in the chemical industry make efficient processes essential.

Contact us to know more on how we have integrated with a major fine chemical company.

Responsive : Logos here should resize up to a readable size then move from 4 to 3 then 2 columns.

GenLots should determine if some of them would be removed on mobile.

This field is variable :

If the pop-up opens from an "Ask a demo" call to action anywhere in the website then the label text should display :

"Please propose some time-slots for the following week"

Clicking here or on the darkened background closes the pop-up.

Nice to have : If the user has already entered some text in the fields then display a warning when closing.
